*The Last of Us is the reason I have a PS3, being an Xbox player, and this guide does a great job of going through the game and getting you out of some situations.*

More can be found in their Limited Edition and Signature Series strategy guides which feature the following:  
Find each and every collectible and gather important crafting materials. Multiplayer Coverage Expert tactics for every single aspect of multiplayer game play. Items, Enemies, and More! Learn about every item that Joel and Ellie will use for survival, the enemies that they will face on their travels, and the upgrades and recipes to enhance abilities and create new weapons. Its all in this guide! Always have a bottle or brick handy Always have a bottle or brick in your backpack, since these often come in handy to distract or stun your opposition. Try taking a Clicker head on, by whipping a bottle at it and going in with melee attacks while it is stunned. Keep Shivs Handy If possible, be sure you have a Shiv handy at all times. These weapons get you through Shiv Doors, where a huge cache of supplies can always be found on the other side. A Shiv is also required to take down a Clicker, once it has been grabbed. This way you can assess the situation and plan your attack. Last thing you want is to be overwhelmed by a group of foes because you ran into the middle of them. Conserve your ammo The harder the difficulty, the more you are limited on ammo and crafting supplies. Therefore, conserve your ammo whenever you can by remaining in stealth as you sneak past enemies or eliminate them with stealth takedowns. Explosives should be saved for Bloaters or large groups of foes. Use one to obscure your escape into hiding when overwhelmed, or throw one at your enemies and rush in with a Shiv at the ready. Explore every nook and cranny Explore every nook and cranny to find parts and supplements, including drawers, cabinets, shelves, and the floor of many areas. These are very valuable commodities and can make your journey a bit easier with Joels Skill and Weapon Upgrades. Weapon Sway and Shiv Master are great skills to buy early Consider grabbing the Weapon Sway Skill when you have collected enough supplements. Defeating enemies from a distance is much easier because this Skill makes the reticule more stable. Dealing with Infected-Stalkers Infected-Stalkers tend to hide behind cover until you are close, where they ambush with a quick attack. Have your Shotgun at the ready whenever these creatures are around, since you dont have much time to react. Interacting with these points starts a conversation, often giving you more insight into what this post-pandemic world is like from other perspectives. These conversations can also earn you money to spend on skins, art galleries, and render modes. Weapon Modifications will make your melee weapons even deadlier Melee weapons become even deadlier once they are modified with the blade and binding Crafting Supplies. Once you are able to make a modification, take the time to craft one of these weapons.
