Read ghost stories, myths, legends and wonder tales from all over Mexico. Mexican Folklore Eavesdropper There is an old tale which claims that at midnight, on Christmas Eve, the cattle will kneel in the barn and speak with one another. Once an old Maryland man decided to test the tale by hiding in the barn at midnight to listen. So he climbed a rope to the window in the hayloft. He lay down on the rough gray boards, covered himself with hay and waited El Muerto After getting the lay of the land, so to speak, frontier man Bigfoot Wallace moved from Austin to San Antonio, which was considered the extreme edge of the frontier, to sign up as a Texas Ranger under Jack Hayes. In them days, Texas was as wild as the west could get. There was danger from the south from the Mexicans, danger to the wet and north from the wild frontier filled with Indians and desperados, and to the east the settlements still had problems with the Cherokee Nation Girl in White He was sulking a little, standing at the sidelines while all the other men danced with their pretty partners. His girl had not come to the dance that night. Her mother was ill, and so his girl had remained at her side. A fine pious act, he thought sourly, but it left him at loose ends. The three Mexican immigrants were living on a small, successful farm and the men were also working a claim near Hangtown. However, the other miners living nearby tried to run them off, telling them that it was illegal for Mexicans to pan for gold or hold a claim. Llorona, Omen of Death They say that the Llorona was once a poor young girl who loved a rich nobleman, and together they had three children. The girl wished to marry the nobleman, but he refused her. He told her that he might have considered marrying her if she had not born the three out-of-wedlock children, which he considered a disgrace Mexican Fairytales From the Bear-Prince: Once upon a time there was a very poor woodcutter who had three beautiful daughters. Of the three girls, the youngest was the most beautiful. One day the woodcutter went into the forest and was chopping down an oak tree when a very large and horrible bear wrenched the axe from his hands

The Awareness Boosting Collection. The books incorporate reading with rhythm and rhyme, critical thinking, reflective writing, creative expression activities and stimulating illustrations, while fostering social, emotional and spiritual intelligence. Families learn together with topics like awareness, resilience, connection and gratitude to cultivate a life-long love of learning, and so much more! In the busy modern world, there is so much distraction from family time, so much pressure on parents to provide and on children to perform. But remember, every moment we have a choice. Breathe in, breathe out. In her short rhyming adventure she discovers insights about her thoughts and emotions, how they influence her being and the world around her. Annie learns to expand her awareness and develop her social and emotional intelligence. This has the flow on effects of improved wellbeing and family connection. This is what we all want right? Well I need your help! Samantha Starshine and family. Now finally, my dream of writing stories for children is coming true. To share it with the world! This is not just a story, although, my style has been dubbed Deepak Chopra meets Dr Seuss , each book also includes a section of questions, information and further resources at the end for families to utilise, to thrive in love and awareness. This is not just a book, it is a movement. Out of fear, competition and isolation Into love, awareness and connection. For every child, mother and father, to connect in awareness with themselves, each other and the environment. This is what the world needs. You are what the world needs. Your donations will go towards the printing and other out-of-pocket costs such as ISBN, barcode, copywriting etc. Please help us by buying the books and sharing this campaign! With joy and gratitude, What the mind can conceive and heart can believe, YOU can achieve! Risks and challenges We are ready to roll! Order NOW and get your books before the holidays. Joan Weldon as Pat Medford. I Love Nuclear Power: The ants are enormous because of radiation-induced mutations. Unless you aim at the antennae, effectively blinding the ants. Though this is still a pretty grim dark movie, mostly played straight, but averted for one subtle instance offscreen before the start of the film; see Fridge tab The ants are certainly dangerous, but Dr. Even ignoring their inability to cross the oceans without some monumentally unobservant boat or plane crews see below , pistol-caliber rounds are shown killing them. Kill It with Fire: This film had flamethrower-toting heroes stalking monsters through dark tunnels decades before Alien. The Main Characters Do Everything: As she exits from the bottom of a plane, her skirt gets caught on a ladder, putting her legs on display for a few seconds. A crewman offers assistance, but she demurs. The Men in Black: Instead the protagonists order the doctor to commit the pilot until the government tells him otherwise. Ah, those were the days; none of this memory-wiping flashy stuff The ants display good lung-power, constantly chittering and shrieking vaguely cicada-like noises. The movie has the straightforward quasi-documentary style of contemporaneous Police Procedurals like Dragnet. Every layer of government behaves as rationally as it can, under the circumstances. Pat Metford screams the first time she and the audience catch sight of a giant killer ant at close quarters, but is calm and professional the rest of the movie. The entire movie is gray scale with the exception of the title at the start. Stay in the Kitchen: Impressively averted, considering the era it was made. This is universally recognized as a very bad idea , yet Hot Scientist Dr. Several uses of the Wilhelm Scream. Although this was long before it became an example of this trope. That Came Out Wrong: No one noticed a bunch of giant ants nesting on a ship? This is at least lampshaded when a character asks the same question.

The film is based on an original story treatment by George Worthing Yates, which was developed into a screenplay by Ted Sherdeman and Russell Hughes. One of the first of the s "nuclear monster" movies, and the first "big bug" film, *Them!* The film begins as a simple suspense story, with police investigating mysterious disappearances and unexplained deaths; it slowly develops into a horror story about radiation-enlarged giant ants. To build suspense, these giants are only heard on occasion and not seen until nearly a third of the way into the film. She soon falls asleep in the police car. They retrace her steps to a mobile home owned by an FBI agent named Ellinson, who was on vacation in the area with his wife and two children. The side of the trailer was ripped open from the outside, the rest of the family is missing and no money was taken. A single unknown animal track seem to be the only clue. Then a strange, pulsating high pitched noise echos out of the desert on the wind. The little girl briefly awakens in fear when she hears the sound, however this is not noticed by those around her. More mysterious deaths and disappearances occur. A general store owner named "Gramps" Johnson is found dead; his store is also torn apart from the outside. No cash was taken from the register, but a barrel of sugar was smashed open. Peterson leaves by car to check on the little girl and make a report, leaving Blackburn to guard the store alone. A plaster cast of the oddly shaped footprint found near the trailer is made and sent to Washington, D. With him he brings Dr. Harold Medford and Dr. Harold Medford examines the footprint. He later tries an experiment on the Ellinson girl by exposing her to formic acid fumes, reviving her from a catatonic state; she screams and yells out "Them! Harold Medford will not reveal his theory quite yet; doing so prematurely might lead "to a nationwide panic". While investigating the Ellinson campsite later on, the junior Dr. Pat Medford encounters a giant, eight-foot long foraging ant and screams. The lawmen run to her and empty their. On directions from Dr. Harold Medford finally reveals his theory: Poison gas bombs are then tossed into the nest. General Graham, Peterson and Dr. Pat Medford descend into the nest to kill any survivors. Deep inside the nest, Dr. Pat Medford finds evidence that two other queen ants have hatched and have left to establish new colonies. Trying to avoid a general panic, the government covertly investigates any reports of unusual activity, even sightings of "flying saucers. The freighter is later sunk by heavy U. Another report leads them to a rail yard with a smashed boxcar missing its 40 ton cargo of sugar. Another report takes them to a state psychiatric hospital in Brownsville, Texas and to a pilot who insists that his small plane was forced down after nearly colliding with three UFOs shaped like giant ants; agent Graham believes his story, then quietly but firmly requests the pilot remain hospitalized until further notice. An alcoholic in a Los Angeles hospital "drunk tank" reveals to agent Graham that he has been seeing giant ants outside his window. Given this significant threat, the U. Army declares martial law and a curfew for Los Angeles; more troops are assigned to find and then assault the new nest in the storms drains under the city. He calls for reinforcements and goes in alone to rescue the boys, finally getting them to safety just before he is attacked by a giant ant. FBI Agent Graham arrives with the reinforcements and kills the ant attacking Peterson as other ants swarm to protect the nest. Peterson soon dies from his injuries with Graham at his side. Graham and the other soldiers fight off the giant ants just before a cave-in temporarily cuts off Graham. Several ants charge him, but he is able to hold them off long enough with machine gun fire for the other troops to tunnel through and finally rescue him. The queen and her young "princess" hatch-lings are quickly discovered and then destroyed using flamethrowers. The film ends with Dr. Harold Medford issuing a cautionary warning: What we may eventually find in that new world, no one can predict.

Saturday, February 16, Them! This is the movie that started the giant bug sub-genre within sci-fi. Sure, cheap B-grade sci-fi would later become typified by radiation-spawned giant tarantulas, grasshoppers, praying mantises, wasps, etc. But when Warner Brothers released Them! Others would repeat the premise, but never matched the power of Them! It pays to be first. Warner Brothers, an "A" studio" got cold feet just prior to shooting and scaled back the budget. Plans to shoot color were scrapped. Given the context, Them! Her parents are missing and their travel trailer is wrecked. A few miles away, a local store owner is found dead in his wrecked store. A trooper is also missing and presumed dead. They find a giant nest out in the desert. Even though they kill all the ants within, three young queens have hatched and flown away to establish new nests. Two of the new nests ultimately fail, but one succeeds in the sewer tunnels beneath Los Angeles. Strange sights and bizarre deaths alert the authorities that the ants have a new home. Ben finds the boys, rescues them, but is crushed by the jaws of a giant ant. Robert leads the army in to killed the ants in the egg chamber before three new queens can fly and spread new nests. The world is saved. Why is this movie fun? The acting is A-level, neither wooden nor over-the-top. The format is part murder mystery, part monster film. The direction is tight, with a variety of shots employed, long shots, close-ups, cuts, etc. The director and cinematographer showed great skill in getting rich tones and textures out of black and white. Note, especially, the night scene in the floodway basin. Oh sure, the giant ants are just big articulated props and look a little silly after decades of special effects refinements and CGI. They do, however, benefit from being "full size" rather than superimposed close-up real bugs or stop-motion models laced in via green-screen. The actors have the benefit of actually seeing a giant ant head to react to. Cold War Angle Them! Atomic testing, imprudent introduction of radiation, caused the humble ants to mutate. To paraphrase Ishiro Honda creator of Godzilla the giant ants become radiation made flesh. They spread far and wide on the wind to bring new destruction far from the original site. Young Leonard Nimoy gets a bit part with a couple lines, as a sergeant in the intelligence office. Pseudo-biblical -- At one point, Dr. Movies today can spout fake verses and get away with it because most viewers are biblically clueless. But, back in the 50s, the general public had much more Bible awareness. The trouble with both, is that the beasts never rule. They just move in because God removed the people. Flattering Imitators -- Many of the scenes in Them! These were sci-fi "firsts" in Them!. Look for the searching-through-sewers scenes. The egg chamber and burning the eggs shows up again in Alien and others. The big critter head popping into the scene will get copied almost ad nauseum. The images from Them! Watch for the repeats in later films. In fact, the only people the ants kill are men excluding Mrs. Ellinson, whom we never see a trace of. She scrambles away and the men loose a hail of gunfire on the beast, killing it. It is interesting that no attempt is made to evoke the tribal abduction angst. The ants were never after our women.

Chapter 8 : Common Bugs and Insects Found in New Mexico

Summary: The story of the little ant is about a small ant that gets stuck far from home due to a small rain shower. The ant tries to get the sun to come up to dry the rain, but the sun cannot because the cloud is blocking the sun.

Chapter 9 : Fat Man and Little Boy - Wikipedia

"The Little Ant is a very cute story about an ant playing in a park. She sees swings, a fountain, a frog, and flowers. This is an adorable story for any child learning words and objects in its surroundings.
