

Chapter 1 : Architecture: Type/Variant House - BlenderNation

The idea of the type/variant house developed from the clients interest in collecting objects in series. As, for example, in a butterfly collection, the essential characteristics and variations among objects appear amplified by grouping them within a type.

Copper cladding, wood framing, stone accents. Process of an Architectural Work. Some nice text A Natural Palette The materials blend into the scenery in such a subtle manner that it does not attract attention, thus increasing privacy. External Order and Organization of the Interior Le Corbusier believed that site, light, form, volume, and geometry were the necessary factors to examine in order to create universal order within a design Curtis, Structure is hidden for the most part, encased in the metal cladding. Forms seem to wrap spaces, creating aesthetic order through volumetric grouping. The stacked form seems to be consistent with typical modern approaches. Each volume reads as an individual unit yet the modules seem to come together as a sculptural piece that captures the sensation of machine integrated in a natural setting. In some aspects, the exterior reads as what is occurring in the interior: The ends of the wings are simply destinations, mainly bedrooms which sit tucked away in privacy while allowing distinct views. Axonometric capturing basic forms left. Without a plan you have lack of order, and willfulness. The most dominant spaces such as the studio and roof terrace are located on the upper level as if they were the final destination. The logic of the circulation is thoughtful of the spatial programmatic concept. Relationship to Modern Ideals Transformation of a Machine for Living In Post-war modern ideologies of the machine in the twentieth century quickly went from innovative and healing to monotonous and destructive. People had become pessimistic about the abilities of the machine and doubted its cultural and social benefits. Le Corbusier was the first to develop this idea of a machine for living in [4], a house whose functions had been stripped to its essentials Curtis, , and justified this in his Five Points of Architecture. What exactly constitutes a machine? It can be implied that anything that works for the purpose of human activity and easing man is considered a machine. While its performance is certainly more than adequate enough to support the lifestyle of the users, it is simultaneously respectful to nature.

Chapter 2 : CGarchitect - Professional 3D Architectural Visualization User Community | Type/Variant House
