

Chapter 1 : Valentine's Day Math Worksheets

Valentine's Day Worksheets JumpStart's collection of printable Valentine's Day worksheets is perfect for teachers who want to celebrate the festival of love without letting up on the learning. Whether it's time for math, English or arts, add some fun and excitement to the lesson with these free Valentine's Day worksheets.

Experiments in Love Lead a classroom discussion that explores some scientific reasons that people fall in love. As students ask questions and pose potential answers hypotheses , write them on the board. These will be your research questions for the next step of the experiment activity. Then, break students into groups. Assign each group one of a research question. Using the Scientific Method, students will describe how they could execute each step of the experiment to see if their hypothesis is correct. The bulk of their description will deal with the experiment itself. For the experiment stage, they should identify the necessary supplies, method of monitoring and tracking data, independent and dependent variables, etc. This critical thinking approach will make them think about experiments on a higher level than just executing the steps of a typical experiment assignment. Magnetic attraction – Get out those magnets to show how positive and negative charges attract and repel each other! You need to take a special someone for an evening out. First, set your budget. Where will you go? How will you get there? What are some potential unintended costs? Will you bring a gift? Flower Math What better time to cover the increments of 12 by calculating flowers by the dozen? Depending on your current curriculum, adapt word problems that calculate cost per flower, calculate average pedal per flower or per bouquet, etc. Remind students to factor in tax practicing percentage calculations and delivery charge for multi-step word problems. Younger students can just count, add, subtract, multiply, divide the flowers, petals, etc. Brainstorm their product or service. Who are my potential customers? Your produce can be as simple as pre-made valentines, but you need to consider the cost of the paper, scissors, markers or computer products needed to create the cards. Allot part of your budget for advertising. Even if this just means posters around school, list the cost of those posts, tape, etc. Set pricing, sales goals and projected profits for your business Step 4: Compile all of this information into a presentation for the class. Create a prototype, demonstration or drawing of your product to really SELL the idea to potential business investors. Share in the comments section!
