Chapter 1 : Church of England Record Society

TIMES LITERARY SUPPLEMENT [Following on from the highly-praised first volume of visitation articles, covering the years] This selection of articles and injunctions issued by archbishops, bishops, archdeacons, and other ecclesiastical ordinaries in the early Stuart church concentrates on the church of Charles I, from his accession in.

Additional Information In lieu of an abstract, here is a brief excerpt of the content: Edited by Kenneth Fincham. This is the second volume of a two-part edition of visitation documents from early Stuart England. Volume one, published in , concentrated on the Church of James I for the years to , and in this companion volume the editor expands his collation of visitation records for the years to . The historical value of these documents is clear, not only in what they have to say about particular visitations, but also what they reveal about the larger Stuart church when viewed in relationship to one another. Visitation articles set out the areas of inquiry anticipated in an ecclesiastical visitation for any level of church life, from metropolitanical jurisdictions to the lesser ones of bishopric, archdeaconry, and cathedral chapter. As such, these articles could be tailored in any way the visitor deemed meaningful for the effectiveness of an upcoming visitation. At the end of the process the visitor could issue injunctions to the region visited which contained moral adjurations or even disciplinary statements regarding what was discovered on visitation. In between, of course, lay the substance of the tour, the sworn depositions of clergy and laity who were called upon to answer the articles and testify to the moral, liturgical, and material condition of their church and community. With this second volume in his collation of articles and injunctions, Dr. Fincham has given us a trove of materials for early seventeenth-century religious history. These records yield much regarding ecclesiastical administration, ritual, and pastoral care in the Stuart church, more by way of the visitors than those visited. To this extent, the reader can observe the shifting tides of Calvinist and Laudian sentiments in the years covered. To assist in this observation, Fincham has worked out a textual genealogy of these documents, finding seven families or lines from which the vast majority of these materials can be traced. The whole of the edition is fortified with cross-references and notes and an appendix of articles from to along with a thorough index. This is an impressive and valuable collection of records for the early Stuart church. *Irenicism and Toleration in the Netherlands: The Stinstra Affair*, 1 This book contains as appendices two important early eighteenth-century Dutch works on religious toleration. This work appears both in the original Dutch and in an English translation made by Eijnatten. The second work is the
