

### Chapter 1 : Wizard | Definition of Wizard by Merriam-Webster

*Web Word Wizardry has 13 ratings and 0 reviews. At last, a comprehensive book on writing for the Web and intranet. Beaming with both authority and enthus.*

Sorry for any errors or ramblings that may occur as a consequence of my lack of decent sleep. The subscription box that I am reviewing is a monthly box by Geekgear. I pay in quarterly instalments so it is very slightly cheaper than a monthly payment. If you are interested, you can follow this link: They have other boxes, one of which is a Harry Potter wearable box, filled with Potter themed clothes. There has been one major change that I can see in this box and that is its new booklet. The first item that I opened was yet another wand. They always feel a bit cheap and to make it worse, this was a GeekGear Exclusive. You could get different shades of wand to dictate its rarity, gold or silver. I like them and it is a nice thought. There a key with wings pin badge, which is also, alright. Nothing to jump up and down over, nice quality, fairly heavy, kind of useless, pin badge. As usual we had some posters, there is always one as standard, this month there were three. The A4 print that is a nice depiction of Aragog, and two rolled up posters. The poster depicting the graffiti type image of the houses was double sided and one of my favourite items of the box. This is coming back to University with me in September. The other was a J. This one just seemed a bit forced, but it looks okay on paper. One of the nicer but non-fancy items in the box, were the Vinyl Stickers. I can see these going in the car once I feel like I can stay awake long enough to drive again. They are subtle and nicely designed. Then last but not least we have the t-shirt. In fact, it looks a bit too much like a long beaked Pidgeon. I look forward to the boxes but I now have a feeling of doubt when they arrive. I want the old excitement back. Thank you as always for reading, I apologise once again for my rambles, to make up for it I share with you my purchases of Universal Studios Harry Potter world. Oh, and Peppermint toads! Now going in there was exciting!

### Chapter 2 : Wizard | Define Wizard at [www.nxgvision.com](http://www.nxgvision.com)

*In Web Word Wizardry the author leads the reader through the snares and pitfalls of writing for the Web in a style that demands attention and is directed towards a goal - getting the reader to actually examine the page.*

Students will be able to determine the meaning of words using roots, prefixes, and suffixes. We will use what we know about prefixes, suffixes, and root words to build our own words. Explain that words are made up of parts. Each part of a word has meaning, and when combined, a new word is made. Tell students that OCT- means eight and -GON means angled, so when we combine these two root words, we have a word that means "eight angled. Ask students to think of other root words and call on volunteers to share. Write the student-generated root words in the circle. Scatter the list of roots in the circle as you would with a "brain dump. Repeat for each of the other circles, starting with an example for each e. Keep the chart paper displayed through the remainder of the lesson. Tell students that they will use prefixes, suffixes, and roots to change the word ERUPT into other words. Each step of the word ladder will have only one word part prefix, suffix, or root that changes from the word before it. Remind them to look at the word bank on the worksheet to choose word parts to complete the word ladder. Review the word ladder worksheet as a class. Independent working time 15 minutes Explain: You are going to use what you know about word parts to build your own made up words and definitions. Explain that their made-up words must contain three word parts e. Hand out the word part table. Explain that each word part should be on a separate index card and they should write the meaning of the word part on the back of the card e. Remind students that they also need to come up with a definition for their word based on the meaning of the word parts they used e. Allow students to use whatever tools are available word part table, dictionaries, anchor charts to build their words. Give students about minutes to create their word. Hand out a fourth index card to each student. Instruct them to write their word and definition on the fourth card. Have students share their words and definitions with the class. After the lesson, display the made-up words by hanging the index cards on a dowel or stick so that the word is visible on one side and the meaning of the word parts are visible on the reverse. For students who need more scaffolding, allow them to work with a partner to complete their word ladder. Have students choose all three word parts from the word part table to create their made up word. For an extra challenge, have students create longer words with more than three word parts. Assessment Use observations from guided and independent practice to identify students who will need additional support. Collect and check finished word ladder worksheet to check for understanding. Review and closing 10 minutes Have students meet in a small group and use the word parts on their index cards to mix and match their collective word parts and create even more new words. Hand out a sheet of paper to each group and have them record the words they come up with and the definitions for each word. Call on each group to share a word or two they came up with. Related learning resources Lesson plan Word Wizards Help your students become word wizards! In this creative and engaging lesson, students will review roots, prefixes, and suffixes before creating their own words and definitions.
