

Chapter 1 : Letter to the editor - Wikipedia

The Daily Letter is a project that started with hopes of restoring the beautiful nature of humanity to its rightful place in society. The words that populate these pages are often written to people that we do not know but have encouraged, inspired or restored our faith in humanity.

Subject matter[edit] The subject matter of letters to the editor vary widely. However, the most common topics include: Remarking on materials such as a news story that have appeared in a previous edition. Such letters may either be critical or praising. Correcting a perceived error or misrepresentation. History[edit] The examples and perspective in this section may not represent a worldwide view of the subject. Much of the earliest news reports and commentaries published by early-American newspapers were delivered in the form of letters, and by the mid-19th century, LTEs were a dominant carrier of political and social discourse. Through the 19th century, LTEs were increasingly centralized near the editorials of newspapers, so that by the turn of the 20th century LTEs had become permanent fixtures of the opinion pages. Modern LTE forums differ little from those earlier counterparts. A typical forum will include a half-dozen to a dozen letters or excerpts from letters. The letters chosen for publication usually are only a sample of the total letters submitted, with larger-circulation publications running a much smaller percentage of submissions and small-circulation publications running nearly all of the relatively few letters they receive. Editors generally read all submissions, but in general most will automatically reject letters that include profanity, libelous statements, personal attacks against individuals or specific organizations, that are unreasonably long most publications suggest length limits ranging from 100 to 300 words or that are submitted anonymously. The latter criterion is a fairly recent development in LTE management. By the 1980s, editors had developed strong negative attitudes toward anonymous letters, and by the end of the 20th century, about 94 percent of newspapers automatically rejected anonymous LTEs. Although many journalists derided the anonymous call-in forums as unethical for instance, someone could make an unfounded opinion without worry of the consequences or having to back the comment up with hard facts , defenders argued that such forums upheld the free-press tradition of vigorous, uninhibited debate similar to that found in earlier newspapers. Although primarily considered a function of print publications, LTEs also are present in electronic media. By the early 21st century, the Internet had become a delivery system for many LTEs via e-mail and news Web sites in fact, after several envelopes containing a powder suspected to be anthrax were mailed to lawmakers and journalists, several news organizations announced they would only accept e-mail LTEs. Because the Internet broadly expanded the potential readership of editorials and opinion columns at small newspapers, their controversial editorials or columns could sometimes attract much more e-mail than they were used to handling " so much so that a few newspapers had their e-mail servers crash. Clark of the St. Paul Pioneer Press, who wrote, "Consider letters as a barometer of how well you are engaging readers or viewers. This can promote a debate of issues that are personal, contentious or embarrassing, yet are of importance to raise in a public debate. His local paper wrote a front-page story under the headline of " MLA Reitsma is a liar and we can prove it.

Posted by Ken on May 23, Seneca was a prominent Roman philosopher and playwright who published several essential works about Stoicism. He is considered one of the three key Stoic philosophers alongside Marcus Aurelius and Epictetus , counseled Emperor Nero, and is often credited with rendering Stoicism more accessible to a larger audience than his counterparts. You can read a longer profile about Seneca here. In basic terms, Stoicism teaches us that if we have the essentials and a strong inner spirit , we can radically accept and endure whatever circumstances the universe throws at us. Letters from a Stoic , which Seneca wrote toward the end of his life from approximately 63 AD to 65 AD, expands upon these lessons. Letters from a Stoic is presumably a collection of letters Seneca sent to his friend Lucilius “ then the procurator of Sicily essentially an official in Ancient Rome “ advising him on how to become a better Stoic. The first recorded full translation of these letters to English was by Thomas Lodge in , and they have been translated many times since. Letters from a Stoic contains a selection of these letters and key lessons about Stoicism , such as making the most with what we have in the time we have. We have broken down the central lessons from the book below. Instead, Stoicism preaches that moderation is key , function is more important than form , and that we should not live in excess. Avoid binging on that whole bag of Doritos, basically. We are raised in a society that values ornamentation, so it may be tricky to rid ourselves of that desire. Seneca gives us guidelines on how to free ourselves from this mindset. We should work on being satisfied with what we do have, to take pleasure in the simple things. Those who want more than what they need and what they have will always want more, and this only leads to a cycle of dissatisfaction. Seneca advises us to spend time living without these extras of our own free will. He says we should cultivate a relationship with poverty. In a modern context, we might experiment going without our computers, our phones, our TVs and intentionally fasting from time to time. Once we know we can handle life without these things, we can be free from the fear of losing them. On top of being happy with the essentials, developing our inner self is key. Seneca has advice on how to do that as well. Seneca insists that these are not worthy excuses “ we can and should make time for our mental health “ it is an important full-time job, not something we should shove to the side in favor of other tasks. But where do we start on this self-improvement journey? Being content with enough as discussed above is an important piece. However, Seneca expands upon self-improvement in more ways throughout his texts. One of the first steps to improving ourselves is recognizing our own flaws. For a lot of us, being troubled by the outside world is one of those flaws. Some philosophies aim to eliminate feeling those troubles at all. While Stoicism wants to lessen the impact of external factors on our happiness, it does not tell us to avoid being troubled, which Seneca views as unrealistic, but rather to know that we will overcome these troubled feelings. If there were anything substantial in them they would sooner or later bring a sense of fullness; as it is they simply aggravate the thirst of those who swallow them. Bragging about this lifestyle not only defeats part of the essence of the lifestyle, as showing off to others is an external form of validation rather than inner , but it also may alienate others from trying it out. We should lead quietly by example and then help those curious rather than trying to proselytize. As an aside, Seneca does not suggest that physical health is unimportant “ maintaining our health is important for both ourselves and those who care about us “ but does say that more energy should be put into cultivating our minds. Our bodies will eventually fail us as we age and illness strikes, but enduring these eventualities is easier when we have strong minds. Finally, we should embrace the present moment. While we should examine our past and our flaws in order to make future decisions, we should live in the present as much as possible. As for anxiety “ worrying about the future “ that does not help either. What will come, will come. The best thing we can do is fortify ourselves and know that we will overcome our misfortunes , but dread does not serve us. He also emphasizes the importance of being your own friend; that the person who befriends themselves will never be alone and will be a friend of all. First, we must acknowledge that we are all equals. We are not better than others due to our circumstances, our occupation, or

our place in our society. Our positions can change at any moment – slaves become masters, masters become slaves, princes become paupers, and so on – we should not look down on anyone based on our current, possibly temporary, positions. Then we must judge who is worthy of being our friend. We should be cautious of their influence. Crowds can lead us to indulge in our vices in ways we may not on our own. Think of being encouraged to down shot after shot at a party, or the mobs of old gathering their pitchforks in united bloodlust. This mob mentality is not only dangerous to others, but to our own character. Crowds can lead us to losing control of ourselves, which Stoicism strongly discourages. However, Seneca does not urge us to isolate ourselves from all of society. We can celebrate, holidays for example, with others if we are determined to avoid indulgence in excess, as well as to avoid becoming too involved in groupthink. Perhaps you will be cajoled, made fun of, or otherwise judged – peer pressured – by those who want to bring you to their level. But Seneca reminds us that the judgments of others do not matter as much as our own – we must strive to live with virtue and integrity, because at the end of the day it is ourselves we must face. Now who should be considered worthy of being a friend? Seneca advises that we do not use the term friend lightly – his teachings here boil down to quality over quantity. We should spend our energy on cultivating a few friendships rather than many. Is our potential friend a good influence? We should surround ourselves with people we seek to be like, who will help us improve and grow, rather than those who may negatively impact our lives. While we of course can counsel those who are in a bad place, we should be wary of allowing them to come so close that we are affected by their negativity. Also, we should not base the friendship on how useful the friendship is, even if the friendship is useful to both parties. This is because once that usefulness has dried up, the friendship will likely fall apart. This next lesson is key. If we treat our friends with suspicion, like they might betray us, then we may bring about a self-fulfilling prophecy. We should be able to tell our friends things we only tell ourselves. What about losing a friend? To circumstance or to death? While grief is only natural, we should not succumb to it. We must recognize the sweetness of the friendship, the positive, cherished times we had. We can endure loss, and we will grow from it. We will find new friendship, new love. The sections above cover the majority of the musings and lessons found in *Letters from a Stoic*. We do, however, encourage you to read the book for yourself, which you can purchase [here](#). I am acting on behalf of later generations. I am writing down a few things that may be of use to them. The wise man needs hands and eyes and a great number of things that are required for the purposes of day-to-day life; but he lacks nothing, for lacking something implies that it is a necessity and nothing, to the wise man, is a necessity. It does not make any difference what a man says; what matters is how he feels, and not how he feels on one particular day but how he feels at all times! Only the wise man is content with what is his. All foolishness suffers the burden of dissatisfaction with itself. Stoicism primer and resources.

What to include in your letter Resignation letters should be simple and straightforward. Vicki Salemi, a career expert for Monster , laid out the four basic pieces of information that must be present: Even if you had your differences, thank your supervisor for the opportunity to work for the company. It could be shared with potential future employers, so keep its contents professional and polite, she wrote. Although it might make sense to explain a relocation or a decision to leave the workforce, our sources agreed that it is not necessary to tell your current employer why you are resigning. This is especially true if you are leaving for a competitor: Spiteful employers may contact your new workplace and speak poorly of you. What you hated about the job: No matter how bitter you are, resist the urge to vent in your resignation letter, Salemi said. Twersky stressed the importance of keeping a calm, professional tone in your letter. An aggressive or otherwise emotional letter will only come back to hurt you. Similarly, Salemi recommended avoiding emotionally charged personal sentences that include "I think" or "I feel," unless they are expressing a positive sentiment of gratitude. These are also good tips for the conversation in which you tell your supervisor or manager that you are leaving. Just stay polite, respectful and professional throughout the discussion. Resignation letter template Based on advice from our expert sources, here is a basic, all-purpose resignation letter template that you can fill in with your personal details. Remember, you are not required to include your reason for resigning in your letter. My last day with [company] will be [end date]. To ease the transition after my departure, I am happy to assist you with any training tasks during my final weeks on the job. I intend to leave thorough instructions and up-to-date records for my replacement. I would like to take this opportunity to thank you for the knowledge and experience I have gained by working here. Sincerely, [Your signature and printed name] Less is more when it comes to resignation letters, Salemi said, so be as succinct as possible. She also noted that you should submit a revised letter if your end date changes for any reason.
