## Chapter 1 : Using a Word Web to Expand Vocabulary - Speech And Language Kids

*Word Within The Word makes the costly, time consuming, quick-fix/quick-forget tutorials of junior and senior high school years things of the past. Word Within the Word provides internalized, maximum, meaningful, impact at the time the students take PSAT's and SAT's.*

Photo Gallery Michael Clay Thompson: These books can be used as stand-alones or as part of a vocabulary program for young students. They also set the stage as preparatory complements to the more advanced The Word Within the Word series. Building Language introduces students to the concept of Latin stems as the foundation for English academic language. Learning the meanings of the stems allows children to figure out the meanings of many other words that contain those same stems, even if the children have never seen those words before. These editions are longer than the standard editions; in fact, they are so filled with extra elements, such as nonfiction essays, creative writings, and photographs, that the student books come in two separately bound parts. The implementation manual is also enhanced with a great deal more helpful instructional material. These editions are particularly appropriate for those pursuing a classical education, expanding the material devoted to the Roman context, including maps, biographical sections on Caesar, and a series of poems by Michael Clay Thompson. They also contain essays by Thomas Milton Kemnitz on Roman architecture, construction methods, roads, and buildings. The new sections are buttressed by more than a hundred photographs of the world that was Rome. In all three volumes, the author has chosen examples of the use of words and their stems in the best sentences he could find—even if a sentence was from books likely to be read in high school rather than in elementary school. The fourth book in the series is The Vocabulary of Literature, which highlights the vocabulary commonly used by the greatest authors of English and American literature. This book allows students to see the vocabulary they have been studying in the context of the fiction and nonfiction writings of immortal authors. Latin and Greek stems are presented as a system of thinking, a way of building, analyzing, spelling, pronouncing, using, and choosing words. Consequently, students will know far more than the list of words encountered in this course—the tens of thousands of words that are not listed but that are expressions of the system. Every test reinforces every list. Through constant review, students build ever-increasing familiarity. The books also include historical essays written by Dr. Thomas Kemnitz about ancient Greece and Rome. All three books include discussions, maps, timelines, and scores of photographs of ancient buildings, sculptures, and artifacts. Michael Clay Thompson Course Packages We have made available special packages of the curriculum to help make your ordering easier and to save you money: Homeschool Packages MCT Vocabulary Component Online All of the books in the vocabulary strand have been developed into online courses that will allow students to think deeply through a variety of learning activities. Each book can work as a stand-alone course, or it can be integrated into a larger course or study. These online courses work effectively for schools using Response to Intervention RtI and Balanced Literacy frameworks so that academically talented students can access an education that meets their needs. The online component for the vocabulary strand is now on sale to provide school districts and homeschool families with options that are flexible and affordable. Online seats may be purchased separately or in conjunction with the printed student book. See our online options. Michael Clay Thompson Course Packages We have made available special packages of the curriculum to help make your ordering easier and to save you money. ## Chapter 2 : Word Study Activities from Words Their Way

*Find helpful customer reviews and review ratings for Word Within the Word Student Book 3 at www.nxgvision.com Read honest and unbiased product reviews from our users.*

This article presents a word web for mapping out a new word and as well as a word web for themed vocabulary. You can do this by creating a word web that maps out the new word. Go through a book with your child that is at or slightly above his reading level. You could also do this with an assigned reading from school. Chances are those words will come up again. Draw the following word web on a piece of paper. If desired, stick that paper in a page protector so that you can write on it with dry erase markers and use it again. Write the target word in the middle of the word web and then fill in the circles that surround it. Use another piece of paper if you need more room. Identify words that mean the same thing as the target word. Identify words that mean the opposite of the target word. If applicable, talk about what category the word belongs to. Word Parts and Meaning: Break the word apart into as many pieces as you can that still have some sort of meaning. Talk about the parts of the word and what each one means. This will help your child learn to decode other new words when he encounters them. Function If it is a noun, talk about the function of that object. If it is a different part of speech, talk about what role the word has in the sentence. For example, the conjunction brings two thoughts together. Descriptors For nouns, use the five senses to describe the word. How does it feel, look, taste, sound, and smell? For verbs, include what adverbs you could use to describe the action. Other Info Include any other information that you have about that word. After creating this word web with your child, he will have a much better understanding of what that word means. Make a Vocabulary Word Web If your child is struggling with vocabulary from a particular unit or theme at school, try creating a vocabulary word web for common words that your child might encounter. Pick a unit or theme and find an age-appropriate text about that topic. Go through the text with your child and pick out words that seem to be key vocabulary for that unit. Many textbooks with include a list of key vocabulary at the beginning or end of the chapter. Write all of those words on a piece of paper. Next, look at the list with your child and see if you can find similar traits that would allow you to group the words into categories on your word web. You could group them by part of speech see the description above. You could also group them by topic. For example, words about The Earth may be grouped by land, water, and sky. Then create more circles for your groups and have those branching off the topic. Finally, have each word in its own circle that branches off of one group. You can even have your child decorate them and hang them where he can review them later. What other word webs do you create with your kiddos? Leave a reply to let others know! Where to Find More Info: This guide, along with 38 others, is included in Ms. Speech and Language Therapy Guide: This guide includes detailed information on teaching various speech and language skills, including this one, along with worksheets, handouts, sample IEP goals, data collection, and video demonstrations.
