Empowering you to launch your business at any budget The Shocking Truth About Essay Writing Services Writing is a vital skill that is applied in many areas of life, especially for those who are entering the workforce, whether they are doing so as an employee or a business owner. I recently had the opportunity to speak with a former writer for a prestigious essay writing service and his experience in the industry. When I became part of the team for Rush Essay , I thought we would be writing academic content for students with below-average capacity. I was in for a surprise. I was convinced that students who got into Harvard, Berkeley, Oxford, Cambridge, and other prestigious US and UK universities would work much harder than the ones admitted to "secondary" schools. In fact, they do work hard; and that is the exact reason why they cannot afford to fail. The struggles of ESL students are even greater; it is nearly impossible for them to produce degree-level academic content. Since the charges for plagiarism are serious, they have to rely on essay writing services as a solution that provides unique content by the given deadline. The essay writing industry is a source of interesting statistical data. California, New York and Texas are the most popular regions where orders were coming from. A student who hopes to graduate from one of these universities usually needs to rely on "unorthodox" methods to deal with all challenges imposed by the professors. Since academic writing is becoming one of the most prominent aspects of the educational system, the constant development of the custom-writing industry is clearly justified. The most popular types of content requested from custom-writing services are essays, research papers, and MA thesis. Students have an abundance of essays and research papers to write, so there is nothing unusual in the fact that professional writers mostly deal with these types of assignments. When it comes to subjects, students most commonly struggle with projects for Business, English language, and Management courses. According to those within the industry, buying papers is a necessary reaction to serious underlying issues in the educational system. All college and university professors will tell you the same thing: However, some argue that the issue is more complex than that claiming, that the content completed by professional writers is not plagiarized. It is completely unique, well-researched and properly-referenced. When a customer buys this type of product, he has the right to use it as a source for another paper, or simply submit it as his own. Higher education is an industry on its own. The benefits of using custom-writing services are immense for foreign students. In addition, students with part-time jobs, older students who have families and those who are going through tough personal struggles simply need help to go through all challenges they face. The rapid growth of the custom-writing industry is a symptom of the great weaknesses within the educational system, which put students through a great deal of stress and emotional struggle. What About The Moral Argument? We all know the definition of cheating is, and simply saying that the work is more challenging for most or that they may not receive enough support from educators, or have enough time to dedicate to the work does not change the definition of cheating, or make it right in any way. Speaking from both ends of the argument, there are those that feel as if these services are creating lazy students and helping to grow an unprepared workforce. Writing is a vital skill that is applied in many areas of life, especially for those who are entering the workforce, whether they are doing so as an employee or a business owner. With communications being a vital skill for anyone entering the workforce, our education system recognizes this and strives to prepare our students by requiring them to improve this skill through writing assignments. By outsourcing the work, students, are depriving themselves of the opportunity to strengthen their communications and writing skills. Are professors and teachers that difficult to reach that so many prefer to risk the stiff penalties of being caught cheating, rather than asking for help? There are many other options available for international, and any other student that may be struggling to keep up, from study groups, to programs within schools and Universities, such as writing centers. What they do require, however, is that the student actually make an effort, by simply making the decision to apply themselves.

Given that the company has been in this business for three years, there is enough information and customer feedback for us to provide an accurate and objective MyPaperWriter review. We have used the same criteria as we use for all of our writing service reviews – the information we find on the website, conversations with the customer support department, My Paper Writer testimonials published on the site, other customer feedback and comments on the web, and an evaluation of a university-level research paper ordered by our team. This summary has taken all of these criteria into account. Admissions essays and editing, proofreading and re-writing round out the academic product line. The company also has a focus on business writing, including plans, reports, white papers, copywriting, and more. Unfortunately, business writing is not mentioned on any of the site pages until a user arrives at the pricing and ordering stage, so it is difficult to see how anyone would know that these products are even offered. Customer support is available by live chat on the site, by email, and by telephone. My Paper Writer reviews from customers and our own experience showed that the support representatives have some difficulty answering any questions that veer from an obviously pre-prepared script. Wait times via telephone contact can be quite long as well. The Real Proof – Writer Experience and Quality of Products The company says very little about its writers on the site, other than to state that they are all from the U. It does not speak to their degree levels or background requirements in order to write for the agency. There are no samples of writing available for customers to review. Of course the quality of writers is totally reflected in the quality of their products. As we looked at MyPaperWriter reviews on the site and elsewhere on the web, we discovered that they were quite mixed. On the site, as expected, they were all positive. Elsewhere, however, we found complaints related to the quality of writing some insisted that a foreigner had provided the writing, and difficulty getting revisions completed, even though they are advertised as free. Our experience with the research paper order had the same issues. Further we could find no evidence of a MyPaperWriter coupon code or any way to get one. While there was a place on the order form to place My Paper Writer promo codes but customer support could not explain how we could get one to offset the price. We would suggest to the company that they put into place a program of MyPaperWriter. The Good, the Bad, the Beautiful, the Ugly The biggest concern that we have about My Paper Writer is that the information about writers, pricing, and details about products and services are sorely missing from the website content, either on main pages or in footer pages. Further, their prices are quite high for the quality that is provided.

An easy to understand Online Writing Guide for beginning writers. Here you will find a list of various writing models, general tips and hints to help guide you to writing success. The kind of thinking you need to use in writing reviews is the kind of thinking you need to make intelligent choices in life. Before you begin Step One: Decide What To Look At The first thing you need to do before you start your review is decide what aspects of the item you are going to evaluate. What I mean is this: Those are all items you can examine and decide if they are well or poorly done. With a book, you can look at the plot, the characters, and the way that the author puts words together. With a restaurant, you can look at the food, the service, and the setting. In fact, everything has qualities you can analyze and evaluate; you just need to sit down and figure out what they are. Decide What Makes Things Good or Bad Before you can decide whether something is good or bad, you have to figure out what you mean by "good" and "bad. Do you like authors to use a lot of complicated words, or very simple words? Whatever you like, apply those standards to the thing you are reviewing. How to do it It is now time to start putting your essay together. Open with an introduction paragraph that does the following things: Write a full paragraph about each of the aspects you want to examine, making sure each paragraph does these things: End with a conclusion paragraph that does the following: An example by Gordon Korman book review by Mr. The story shows us just how hard it can be to follow this one simple direction. One great thing about the book is the way Korman developed the characters. Each person has a definite personality. The Peach is an engineering genius who needs to improve everything he sees. Jason, our hero, seems to be allergic to work, and while his roommates spend the summer slaving away at a variety of jobs, Jason finds ways to avoid job interviews. At the same time, he becomes a genius in the kitchen, which helps him later on in the story. Rootbeer spends the summer with the boys, taking turns getting the boys into and out of trouble between bouts of Manchurian Bush Meditation and pursuing some of the strangest hobbies in the world. Another great thing about the book is the plot. Just as it seems that the boys are going to finally solve their problems and have a great summer, another problem arises that they have to solve, or else they will have to go back home to Owen Sound as the total failures that their parents expect: The story is hilarious and keeps you on the edge of your seat, and the characters are strange and interesting enough to make you want to know more about what will happen to them next. Out of four stars, I would give this book at least three and a half. Return to the Online Writing Guide Index. Contact a custom review writing service. Are their prices really as low as this statement indicates? And more importantly, do they fit the quality of content? After all, when ordering your papers online, the most important factor is the quality of content because this is what affects your grade. This is why we have decided to evaluate the service provided by a-writer. Types of A-Writer Services The company offers an exhaustive list of services, starting from the most commonly requested ones such as essays, research papers, term papers, articles etc; to more specific, less-commonly requested papers such as SWOT analysis, capstone projects, marketing plans, critical thinking etc. In order to be able to provide all these services, the company would have to work with many writers that are experts in various niches. At the moment of our evaluation, the website counts writers, which is more than sufficient to cover this amount of services. This is something we evaluate by ordering a paper from the company. There are two quality options you can choose from Standard and Premium. Premium quality papers are not much more expensive than the Standard quality papers, which is a big advantage. Additionally, the loyalty program is very fair too, turning the originally high prices into more affordable ones. Taking this into consideration, the pricing of a-writer. Of course, this will all be for nothing if the quality of papers offered at the company is bad. Quality of Paper We must say, the first experience with A-writer. From the paper we got, we can confirm that the term paper was truly written by experienced writers, since we found no mistake or plagiarism in it and the writing style was very good. The paper was well researched and properly referenced, which left us nothing to fix or change. For a Standard quality of paper, we were very surprised with the delivered content. A-Writer Summary Many writing companies offer incredibly low prices, but deliver bad content. There are very few companies that charge a good price for quality content and a-writer. Quality content comes at a higher price, which is understandable. Considering that the company offers the majority of academic papers you may need, we think a-writer.
